

6516204969.txt

I travel around the country allot, and I do not like channel surfing to listen to music or news while traveling because of a bad or weak signal causing the channel to disappear. It has came to my attention that the rights to own and listen to XM Radio is now under attack.

XM IS the radio of the future just as was FM. We have enough people in the government telling the American People what they can and cannot do, or listen to, and enough is enough. I benefit greatly by having XM Radio to listen to throughout the day. There is weather reports, headline News, Music and talk shows just to mention a few with no loss of signal at all anywhere I travel.

I stand firm with XM Radio and their rights to broadcast and I do not think that the National Association of Broadcasters should be able to take my rights muchless XM's right to listen or broadcast XM away just because they feel threatened or because of a dreamed up law hidden back deep within outdated law books.

I feel the laws governing XM should be left up to the People of this great United States of America to have a voice, and not the NAB on this issue.

Thank you,

Gerald T. Smith  
a loyal XM listener going on my second year.
